ABOUT US

We focus on servicing all your Original Equipment Manufacturing needs specializing in the power transmission industry.

QUALITY ASSURANCE

All product and inventory that we sell, initially comes into our warehouse where a random piece is taken from the shipment. Using this piece, we inspect for any faults or incorrect dimensions, making sure that it exceeds standards placed on every item. It is important to us that OEM's get the highest quality material available.

Some of the tests the the parts undergo are:

- Correct angle and tolerances
- I.D. test
- Material certs
- Print verification
- And more to ensure product quality

We are happy to provide samples of the products we sell for pre-production testing by any company interested in working with our business.

OUR BACKGROUND

How we started...

Components On Demand was founded on the idea and values of providing quality parts to OEM's at an affordable price. We are backed by over 70 years of sales experience in power transmission parts, industrial conveyer belt goods, and hose assemblies.

Through our professional association with Thaman Rubber Co., we have access to fabrication equipment and workforce that allows us to fulfill any of your needs.

PRODUCTS OFFERED

Some of the products we offer for the power transmission industry and other OEM uses are:

- Sheaves
- Chains
- Sprockets
- Shaft Collars
- Timing pulleys
- Pillow block bearings
- Gears and gear racks
- Lifting rings and shackles
- 3D printing capability
- And any of your other OEM needs

AREA WE COVER

The area that we provide our services covers a large majority of the country and we will travel and ship wherever your OEM needs are.

The range of country includes the entire south east, parts of the north east as far as New York, the Midwest, and parts of the western United States including Montana, Texas, and Oklahoma.

For each of our clients we are dedicated to seeing you at your facility so it is important to us that we are available whenever you are in need our services.
